

Kirby,
The Vacuum Powered Puffball

Super Smash Brothers Brawl

Character Strategy Guide 5

By Daniel "Misfit119" Acaba

One of Nintendo's most easily noticeable characters, Kirby is the star of one of the best game series out there. Accessible enough for kids but with just enough challenge for any veteran game player, the pink puffballs' success lies in his broad appeal and intriguing gameplay mechanic. How many other characters are so unique that they swallow their foes whole and either spit them back out as weapons or copy their abilities by swallowing them?

Kirby is a veteran of the Super Smash Bros. series, having been in all of the games so far, and he is fairly unchanged. He has a fairly quirky moveset that takes some getting used to and he relies more on speed than power. However his greatest asset is his patented Inhale ability. Not only can he chomp on you a bit to steal one of your powers but he can also spit you out, flinging you right off of the stage you're on.

Combat Strategies

Kirby's small size works both to his advantage and his disadvantage. While he is small and dodges attacks quite easily he also doesn't have too much in the way of reach. This leaves him having to close in on opponents to land most any of his attacks. However this has been fine tuned to work in his favor: most of his moves do more damage the closer you are to your target.

- Kirby might be fairly strong for his size and speed but do not mistake his strength for endurance. He is a marshmallow and has the endurance of one, be careful with him. Stay mobile, all it takes is one good smash to inflict some serious harm on him.

- Not only can Kirby jump fairly high he can float. He can hop upwards about four times letting him get quite a bit of elevation. This is of great use on highly vertical stages or when trying to recover back to a platform.

- Let's get one thing out of the way early here: Do not expect Kirby's ability to steal a foe's special attack to save you. It's more of a novelty than it is anything else and while it might help you out at times by absorbing a good special move every now and again that is the exception and not the rule. For example, absorbing Lucario's Aura Ball attack is a great idea. Mario's Fireball... yeah, that's not much help. Also keep in mind that Kirby has short little arms and legs so not all attacks work so great coming from him.

- On the other hand, Kirby's ability to inhale his foes works out incredibly well in your favor. Not only can you pull an enemy in and spit them off the stage but most players will do their damndest to avoid becoming the puffballs dinner. This leaves them open to be attacked by Kirby, especially if they try to jump towards, or over, you.

- Kirby isn't exactly the fastest character when it comes to aerial movement so try to stay close to the center of the stage where you won't be getting knocked out of bounds regularly. While he can fly he isn't exactly the quickest about doing it, leaving plenty of time for an enemy to leap into the air and smash you right back out of bounds.

- Always try to be aggressive with Kirby unless you're getting too hurt. If you can keep in your opponents face and hammering them with things like his Bicycle kick and Spinning Fury you can keep them on the defensive. By staying close you maximize your damage and force them to play cautiously, this works to your advantage.

- Many of Kirby's moves that deal a good amount of damage are multi-hit. While they can hurt your foes you must learn when to use them so that you maximize your damage potential. If you don't think you can hit your foe with all of the hits from the Triple Kicks then use a Mule Kick, same max damage but it only requires one solid shot to land. Know your moves and you will fare much better than just throwing off random attacks.

- Due to how slow they are, and how range hampered they are, Kirby's basic attacks are borderline worthless. Stick to his running attacks, airborne maneuvers and his smashes for your offense and leave the basic attacks for when an enemy is pressuring you or you're feeling showy.

- When fighting other fast characters you are going to have to get a bit more inventive. Kirby will usually be a bit stronger than them but he is still rather frail all things considered. Alternate between using your Inhale move to make them think twice about rushing in on you and then use your spin moves to try and force them off the stage.
